

Over the past 20 years, I've noticed that 95% of Manual soft tissue therapists have one, if not all of these problems:

Nearly all Manual soft tissue therapists have an inefficient technique and many Manual soft tissue therapists lack some basic patient relation, patient education skills that make a world of difference.

I built my Myotherapy business from 0 to 100 patients per week in just a few short years. Since then tonnes of Therapists have asked me how I did it and if I could share my secrets with them. Well here they are...
